# The *Art* of Outdoor Living

Concordia WPC decking,  
Symmetry Collection in Graphite.

## Find your joy.

From early morning sunrises to stargazing on a warm summer's night, your outdoor living space is where the world slows down, and simple moments become treasured memories. Whether relaxing alone, gathering with family or celebrating with friends, an inspired, multi-functional outdoor space acts as an extension of your home, allowing you to reconnect with nature while experiencing the comfort of the indoors.

We're passionate about helping you create a meaningful outdoor living space – one that combines beautiful details with sustainable design. When you choose Fiberon, you're choosing beautiful outdoor living built for life.

## Who we are.

### **Helpful, credible experts.**

Whether it's finding the perfect board colour or providing tips on selecting a contractor, Fiberon is here to help. We offer straightforward information and honest advice so you can make the best decisions for your unique space.

### **Local roots, global reach.**

Fiberon® products are made in the United States, both in our home state of North Carolina and in Idaho. From these two locations, we distribute throughout North America and to more than two dozen countries in Europe, Asia, Africa, Australia, and Central and South America.

## Why we do it.

### **Longer lifespan, lower cost of ownership.**

From replacing splintered boards to reapplying stain or paint, the average pressure-treated decking needs a lot of maintenance. Dealing with this maintenance can cost hundreds of pounds each year, not to mention the time spent refinishing and repairing old boards. A Fiberon composite deck? Minimal annual maintenance costs and a high-end look that lasts.

### **Safe for your family, safe for the environment.**

Our composites are manufactured using sustainable processes and are free of toxic chemicals. And, unlike wood, they prevent further deforestation. Visit [fiberonbalance.com](https://fiberonbalance.com) to find out more.

An unlikely match.

You’re usually asked to choose between wood or plastic. Natural or synthetic. Paper or plastic. Our sustainability story starts with this unlikely match — all the best qualities of recycled wood, combined with the long-lasting resilience of recycled plastic. The blending of these two materials is the reason why our products last, and why they’re sustainable from start to finish.

Find out more at [fiberonbalance.com](https://fiberonbalance.com).

Concordia™ Decking

95%

Sanctuary® Decking

Time is one of your most valuable resources and Fibron® composite decking is nearly maintenance-free. Unlike Fibron composite decking, wooden decking starts with the chemicals used to pressure treat the timber and needs to be refinished with more chemicals every year or two. That’s a lot of energy (mostly yours). Instead of staining and sealing, we think the most truly sustainable story is one that ends with you, spending time with your family, on your beautiful new Fibron composite decking.

The science behind sustainable outdoor living.

**Trees are beautiful.** About half of what’s in our decking comes from recycled wood — sawdust and leftover material that would otherwise be discarded.

- The average wooden decking area uses about 11 Southern Yellow Pine trees (46.5 sq. m.).
- Each year, Fibron saves more than one million trees from being cut down. That’s equal to 8,300 football pitches worth of healthy forest.

**Plastic lasts a lifetime... or ten.** The other half of the core of our decking boards comes from recycled plastic. Think grocery bags and recycled packaging material.

- Fibron incorporates the equivalent of 2,000 plastic bags into each board.
- Each year, Fibron puts an average of 45 million kilograms of recycled plastic to good use.

**Resourceful to the last drop.** Manufacturing composite decking requires a constant source of water. The good news? We reuse almost all of it with our closed-loop system.

- Fibron’s closed-loop water system pumps over 13 million cubic metres of water each year.
- Fibron recycles the equivalent of 5,300 Olympic-sized swimming pools of water annually.

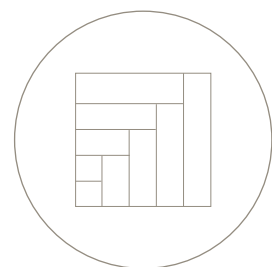

**Don’t waste a thing.** We reuse 98.5% of the waste from our manufacturing process — from misfit boards to router shavings. Every day.

Through Fortune Brands Home & Security, we’re partnering with the US National Forest Foundation in their effort to plant 50 million trees.

## Decking

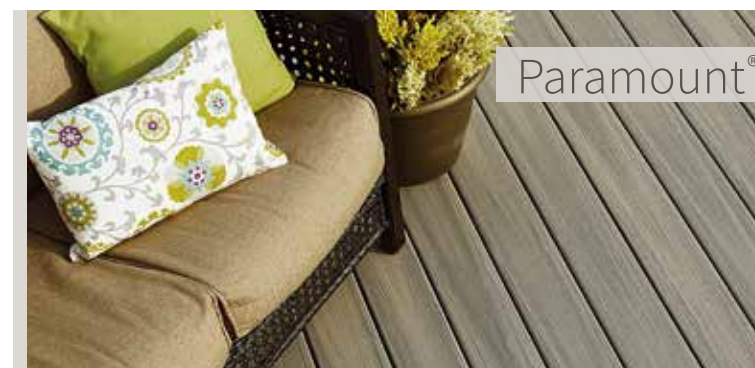

Make every weekend count.

At Fiberon we believe that decking is meant to be enjoyed, not maintained. Our WPC and PVC decking won't warp, rot or splinter, so the look you love today will be there tomorrow.

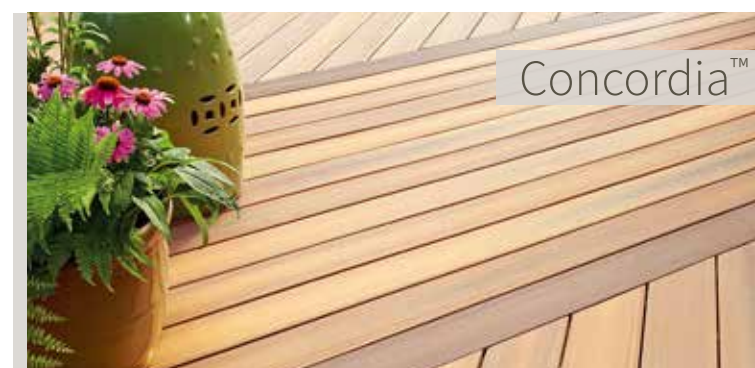

Wooden decking simply can't compare.

Promenade PVC decking in Russet Dune.

## The art of outdoor living.

Evoke the feeling of luxurious living with Promenade PVC decking. Promenade offers the aesthetic of high-end, handcrafted wooden decking, with the benefits of premium PVC.

- Boards feature four-sided capping, streaking on the unembossed underside and a next-generation surface coating for superior weather resistance and durability.
- The slip-resistant\* surface texture is ideal for docks, marinas and other waterside applications.
- Synthetic solid core construction provides protection from cracks, splinters and mould.
- The lightweight, easy-to-handle boards float, making them easy to install in or under water.
- Tested for use in fresh water, salt water and chlorinated water environments, and suitable for use in installations that may be submerged in water, such as dock and pool stairs.
- Boards won't warp or swell when submerged in water, even after being cut.
- When tested against wood or composite boards, Promenade resisted mould, water absorption and discolouration better than the rest.
- FSI15, meets Class A fire requirements in ASTM E84 testing.

Square Edge = 26 mm x 140 mm  
Lengths: 2.44 m, 3.66 m and 4.88 m

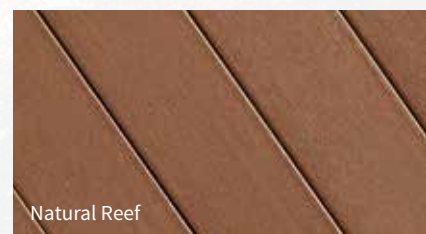

Grooved Edge = 26 mm x 140 mm  
Lengths: 2.44 m, 3.66 m and 4.88 m

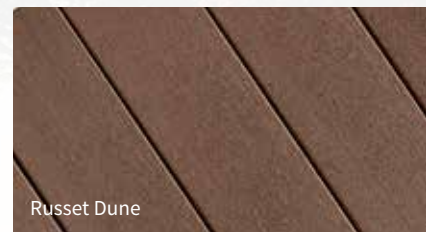

Fascia: 12 mm x 298 mm x 3.66 m

\*Achieved 0.80 average dry/0.75 average wet as tested using ASTM F1679.

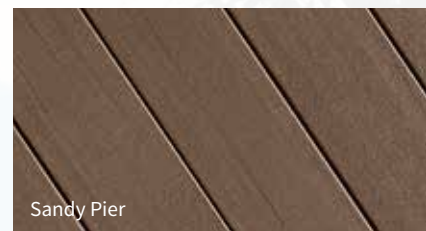

Note: Matching fascias available in all colours. PVC boards should be removed from water sources where a freeze/thaw cycle may occur.

\*When installing Paramount decking, secure stair treads over and in contact with a piece of treated pine 2x6, installed flat, not on edge, as under support and secured with Simpson A23 approved connectors and 10d x 38 mm hot galvanised nails.  
Note: Speak to your Fiberon seller or visit [www.fiberondecking.com](http://www.fiberondecking.com) for details of limited warranties and exclusions. Product information sheet is available on [Fiberon.com](http://Fiberon.com) for exact measurements and tolerances for all decking, fascia and riser boards.  
Fiberon Concordia has been tested to be compliant with the 2012/2015 IRC, Section R104.11 and Section R703, and the 2012/2015 IBC Section 1403.2, Section 104.11, Section 1404.1 and Section 1405.17. It has also met the requirements of ASTM D1929 and ASTM D635, making it compliant with fire ignition and rate of burning standards, and NFPA 268, certifying that it has a low propensity to ignite in the presence of a radiant heat source. It has also met the requirements of Miami-Dade County Florida High Wind Testing protocols TAS 201/202/203, certifying that it is tested to withstand high-velocity hurricane-zone-level winds through cyclical, uniform loading, and large and small missile testing when installed in accordance with Fiber Composites, LLC's written installation instructions.

# Colour

## Make a statement.

Picture your perfect outdoor living space. Is it a serene retreat, designed for relaxing at the end of a long day? Or is it sleek and stylish, ideal for elegant outdoor dinner parties?

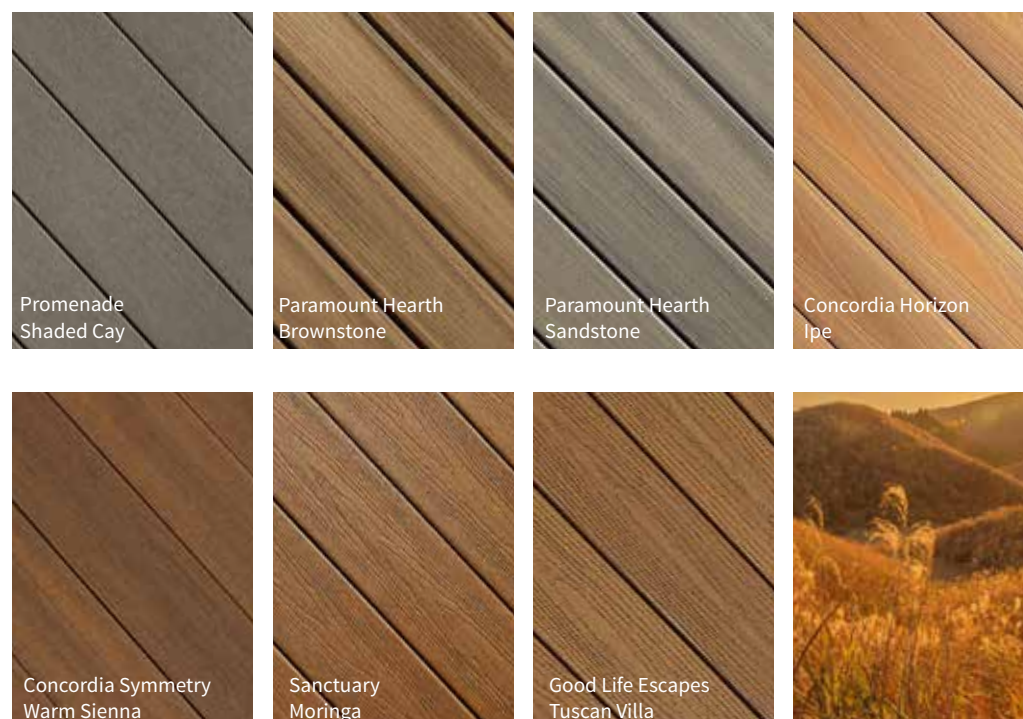

The board colour you select will influence the look and feel of your outdoor space, from subtle, subdued shades that blend with your surroundings to bold, modern hues that provide show-stopping contrast. Each Fiberon® decking collection comes in a variety of nature-inspired, on-trend colours featuring realistic grain patterns.

For a casual, laid-back look, choose cool-toned browns like Bungalow and Sandstone. If you're looking for something more modern, consider mid-tone finishes like Natural Reef, Latte and Espresso. Classic finishes such as Sandy Pier, Weathered Cliff and Moonlit Cove provide a traditional aesthetic.

Mix and match colours within your selected decking collection to create a unique, two-toned look with depth and personality.

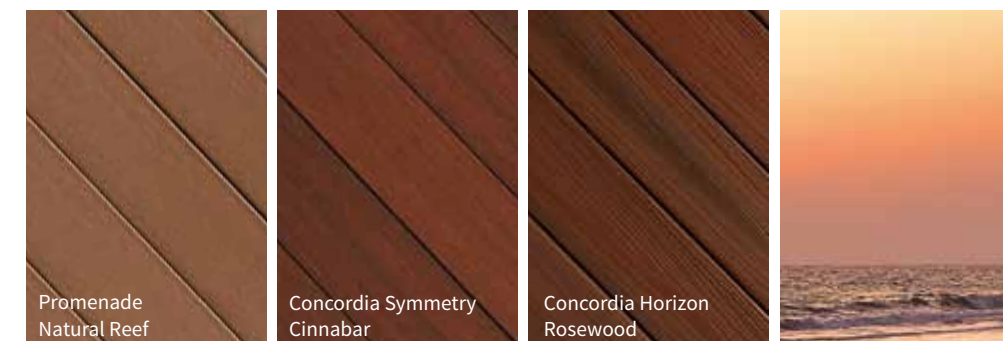

## Golden Browns

Warm and natural, these shades complement any architecture.

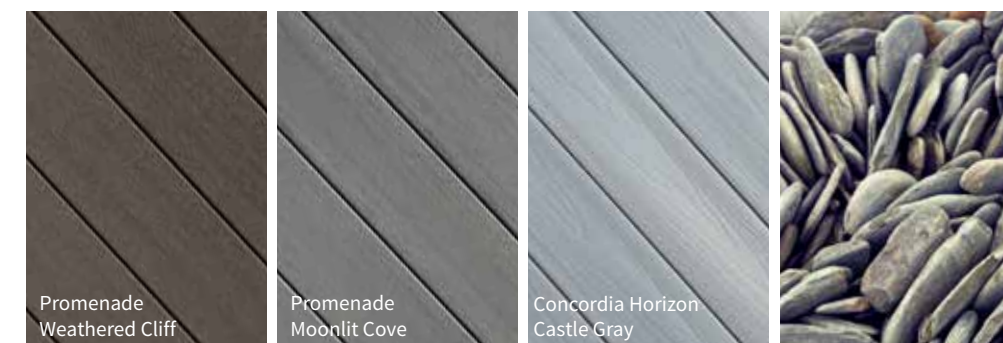

## Reddish Browns

For warmth, energy and landscaping that stands out, choose a reddish hue.

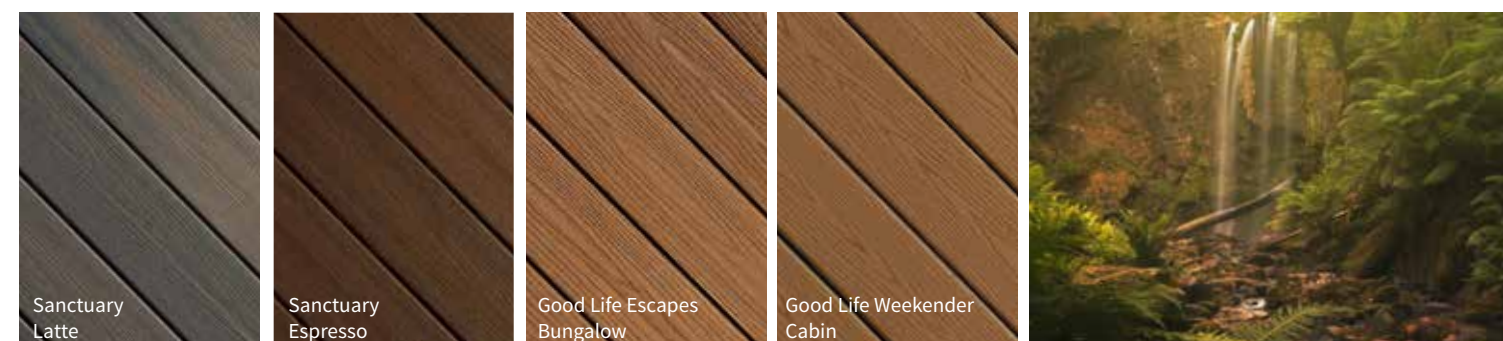

## Greys

Grey evokes thoughts of rocky shorelines and weathered wood.

## Classic Browns

Choose a classic shade of brown to add depth and drama to your space.

## Railings

Change your outlook.

Discover beautiful, durable railing options to complete your outdoor living space. Fiberon® railing is available in a variety of styles and colours that can be paired with any of our decking options to create a custom look for your home.

## Strong is stylish.

From its understated satin finish to its clever sub-rail reinforcement CountrySide Railing is the ideal balance of beauty and strength. The sculpted top rail imparts a touch of sophistication. Three colour choices and two spindle infill options create multiple designs. The smart composite construction and protective bonded cap layer are engineered for performance and longevity.

- Refined satin finish adds elegance.
- PVC composite construction ensures lasting durability.
- Reinforced top rail provides a strong, sturdy feel.
- Hidden hardware gives a clean look.
- Compatible with an accessible handrail system, available via special order.

- Create a Line or Stair section with any kit.
  - Kits available in
    - 914 mm and 1067 mm heights.
    - 1.83 m and 2.44 m lengths.
    - Line/stair sections with square bevelled composite spindles.
    - Line sections with round black aluminium spindles.
    - Stair sections with round black aluminium spindles.

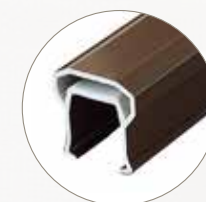

These kits include top and bottom rails, sub-rails, spindles, crush blocks with holders and mounting hardware.

Note: Actual colours may vary from the samples and photography.

CitySide railing in Matte Black.

### Maximise your view.

The sleek, minimalist design of CitySide railing maximises the view beyond your decking or veranda, while the durable, long-lasting aluminium construction minimises maintenance time and expense. Engineered with a pre-punched bottom rail for ease of installation, this lightweight railing solution delivers on reliability, beauty and performance.

- Clean lines and contemporary styling work with any architecture.
- Low-maintenance performance material reduces upkeep time and expense.
- Pre-punched bottom rail enables faster spindle installation.
- Premium powder-coated aluminium resists rust.
- No exposed welds or cuts helps to prevent injuries.
- End, Line and Corner Posts feature integral bracketing, providing a clean appearance and reducing installation time.
- Stair brackets are available for stair and angle installations with stair posts or Fiberon® composite posts.\*

## Decking Fasteners

Engineered for optimal performance and universal adaptability for any Fiberon® decking, these fasteners are designed to enhance the overall finish of your decking project while offering flexibility to suit a varied range of uses and applications.

## Hidden Grooved Fastening Systems

This popular choice offers versatile solutions for grooved decking boards to create a smooth, flawless surface.

## Face-fastening Systems

Our most economical option – designed for project efficiency by combining the simplicity of Fiberon square-edged boards with standard or colour-matched face-fastening applications.

## How They Work

Hidden clips ensure a smooth surface and more seamless transition from indoor to outdoor spaces.

Install decking in half the time with award-winning EDGE and EDGEX Clips. EDGE Clips are for 90-degree decking patterns. EDGEX Clips are for use with any decking pattern. They are pre-assembled, one-pass fasteners with no partial installation required.

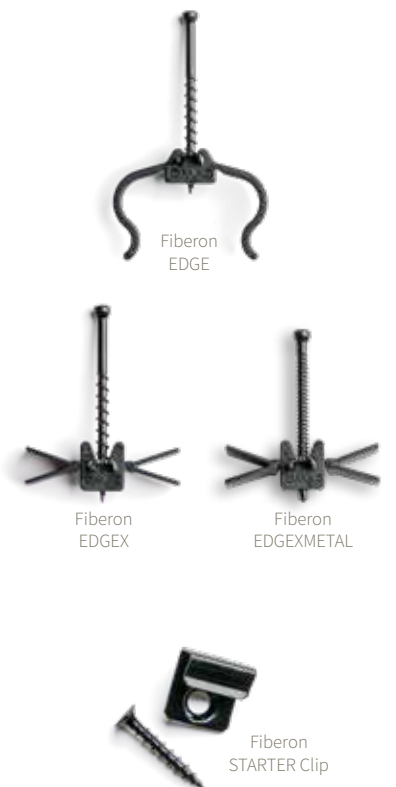

For the Phantom universal fastener, the clip is installed into the groove. Then, a screw is driven straight down into the joist (90-degree angle).

Fiberon and CAMO create products for the consumer who wants to install beautiful decking and have the best experience possible. We value trusted products that are easy to use and help to build perfect decking, every time. As the industry professionals' first choice, and with a first-class consumer warranty, this partnership is bound to build for a lifetime.

## Fiberon® EDGE®, EDGEX® and EDGEXMETAL® Clips

- Install decking in half the time with award-winning Fiberon EDGE and EDGEX clips.
- Fiberon EDGE and EDGEX Clips are designed for use on all grooved decking, including PE and PVC.
- Fiberon EDGE Clips are for 90-degree decking patterns.
- Fiberon EDGEX Clips are for use with any decking pattern.
- Pre-assembled, one-pass fasteners do not require partial installation and are easier to install with the included NEVER-MISS™ Guide.
- Clips creates 5 mm spacing.
- Gusset holds the board down, is up to 88% stronger than competitors' clips in lateral movement tests and up to 50% stronger than competitors' clips in uplift holding power tests.\*
- Fiberon EDGEXMETAL Clips are available with a no. 7 x 50.8 mm 410 stainless steel screw with drill bit, no. 2 tip for 14-18 gauge (1.2-1.9 mm) metal framing.

## Fiberon® STARTER Clip

- Achieve a fastener-free decking surface on any grooved board.
- Versatile clip that is easy to install and can also be used as an L-bracket.

## Fiberon® Phantom® Universal Hidden Fastener

- Easy to install, helps minimise lateral board movement and works with most leading grooved composite decking brands.
- Black HDPE fastener with pre-inserted screw practically disappears between decking boards.
- Carbon steel-coated screw helps prevent rust and corrosion.
- Pre-inserted screw enables easy one-touch installation.
- Self-gapping design ensures consistent 5 mm spacing between every board.

\*Based on independent third-party testing.

## How They Work

Colour-matched plugs and screws camouflage screw heads across the decking surface, stairs and perimeter boards.

The PRO PLUG® SYSTEM is a superior and easy-to-install plug fastening system for PVC/composite decking and PVC trim. Drill and set each screw, then tap in the colour-matched plug with a hammer for a smooth finish.

Colour-matched screws are designed to provide a clean, smooth and uniform finish in composite and PVC decking and fascia. Choose from a variety of curated colours to match Fiberon decking or fascia.

## Hidden Plug Systems

### Starborn® PRO PLUG® SYSTEM Decking

- Package includes PVC/Composite tool, screws and plugs.
- Plugs are made from Fiberon® decking material for a perfect match.
- PVC/Composite tool features Auto-Stop™ clutch mechanism.
- Pro Plug system for decking is available for use with all Fiberon products, including Good Life decking boards that have a relief bottom.

### Starborn PRO PLUG SYSTEM Fascia

Consists of two components: Fascia Plug Tool Set/Fascia Plug and Screw Kit.

- Fascia Plug Tool Set features an Auto-Stop™ bit for setting ideal screw depth and creates perfectly-sized holes for boards to expand and contract freely.
- Plugs are made from composite decking fascia material for a perfect match.
- Can be used with composite risers.
- Fascia Plug Tool Set sold separately.
- Not available for PVC Fascia systems.

## Colour-matched Screws

### Cap-Tor® xd Colour-Matched Screws

- Cap-Tor xd screws are colour matched to Fiberon decking.
- Available for WPC and PVC decking boards.
- Epoxy-coated carbon steel (T-20 Star bit included).
- 305 grade stainless steel version also available (T-20 Star bit included).
- Use with Smart-Bit® Depth Setter for perfect depth setting every time (Part no.: SCREW CTBRD BIT, sold separately).

### Starborn Fascia System

- Pre-drilling and countersinking Fascia Tool with patented Smart-Bit technology.
- Designed to handle the expansion and contraction that can occur with decking fascia boards.
- Screws are colour matched to Fiberon fascia.
- Epoxy-coated carbon steel screws (T-20 Star bit included).
- Fascia Tool bit sold separately (Part no.: SCREW CTFS BIT).
- Also for use on riser boards.

CAMO® DRIVE™

Install decking up to 5X faster with the cordless standing decking fastening tool that attaches to your drill.

- Installs Fiberon® EDGE® and Fiberon EDGEX® Clips.
- Standing tool allows you to install faster than other methods and is also easier on your body.
- Tool is easy to use – adjustable handle, quick-change button to swap out included fastening guides, simple to load the bit and attach to your drill.
- Also fastens CAMO Collated EDGE Decking Screws and CAMO Collated Face Screws (available from CAMO).
- Replacement T-15 Drive™ bits are available.

CAMO® LEVER®

Straightens and locks in decking boards.

- Speeds up the installation of grooved decking – locks in rows of boards and clips before fastening.
- Strong enough to straighten warped boards.
- Can be adjusted for wood and metal joists 38 mm - 76 mm wide for job-site versatility.
- Multi-directional lever locks in one turn.
- Use 2–4 LEVERS along the length of the decking for the best clip installation experience with consistent board spacing.

CAMO DRIVE & LEVER

- One-year warranty from CAMO.
- Sold through Fiberon’s distribution partners.
